Profile

Frontend developer with more than 3 years of experience more focused on UX and user interactions using the latest modern technology such as **Next.js**, **Typescript**, and **React**, to get the benefit of their flexibility and strength. During my career journey, I've learned that communication makes all the difference and collaboration raises the efficiency of teamwork, especially during problems and pressures times. Concentrating on improving on the modern stacks regarding improvement and features in the web development section. Ensuring the highest level of efficiency and UI/UX

SKILLS

- **Main:** JavaScript, ReactJS, NextJS, TailwindCSS, and Typescript.
- **Others:** Redux, Bootstrap, Git, CI/CD, and jQuery
- **Familiar:** UniteTesting, Nodejs, Express, MongoDB, and Mongoose

Experience

Frontend developer, *Prasoft* ⧉   07/2023 – present | Turkey

Enhancing the main website of the firm and one of its relative web apps regarding UI/UX **Prapazar** ⧉
Building a new web app as BigCommerce to target the suppliers and sellers in new sectors like hotels, restaurants, and cafes

Frontend developer, *Shoman systems* ⧉   04/2020 – 06/2023 | Cairo, Egypt

- Designing, developing, and maintaining web apps, statically and dynamically an extensive skill set including **HTML**, **CSS**, **JavaScript**, **Bootstrap**, and **jQuery**.
- Significantly contributed to web apps in designing, and implementing such as **SPC-eg.com** ⧉, which exemplary showcase of my proficiency in creating visually engaging and intuitively navigable user interfaces.
- Demonstrated mastery of **Bootstrap** and **jQuery**, employing these tools strategically to enhance the development workflows and heighten overall coding efficiency.
- Actively engaged in brainstorming sessions, wireframing, UI/UX process, and contributing to the insights that influenced the direction of web projects.

Projects

Naviro ⧉   2023 – 2023

An impactful app developed on MVP architecture, Naviro empowers businesses with advanced features such as content strategy creation utilizing AI, post-scheduling, media uploading, and dynamic business management.

- **Highlights:**
  - Built with **Next.js** for its strength in SEO and simplicity with routing, the ability to make server components, making the app static, and decreasing the latency.
  - Developed with **Typescript** to provide static typing, increasing code readability and maintainability, enhanced error checking before compiling, and IDE intelliSense.
  - Implemented with **TailwindCSS** for easy styling, **Redux** as a management data system, and **Auth0** to provide a safe secure way for the user to log in and use their token to handle API requests.

Wanderly ⬈   2023 – 2023

An impressive travel web app featuring an intuitive UI for seamless hotel and flight searches, offering user-friendly features such as recent search history, responsiveness UI, and favorite destinations with filters and more features and responsiveness.

- **Highlights:**
  - Designed and developed a user-centric travel web app from scratch using **React** and **TailwindCSS** to speed up the styling process.
  - Integrated **Auth0** to provide extra features such as wishlist and recent searches with sign-up with different platforms.
  - Built with **Redux** to manage the data coming from an **API** between the components.
  - The app has features like searching for hotels and flights with a filter, saving wishlists in the profile, and recent searches.

Foody ⬈   2023 – 2023

A comprehensive restaurant management app featuring dine-in services and home food delivery options. The app includes an admin dashboard empowering restaurant staff to manage meals, orders, reservations, and customer inquiries effectively and more.

- **Highlights:**
  - Developed with **React** for simplicity and light weight of its bundles and styled with **TailwindCSS** due to efficiency with low-level code.
  - Integrated **Firebase** for real-time data synchronization, and **Redux Toolkit** to manage the data between the user's side and the admin's side.
  - Implemented **Auth0** to provide a simple way for the admin to log in to track all the data such as orders, reservations, and meals, and modify them.

Education

Business Administration, *Ain Shams University*   09/2016 – 06/2020

Languages

Arabic (Native) | **English** (Fluent) | **Turkish** (Conversation)
