Verify Platform, Turkey
2019 - 2020

Study design briefs and determine requirements, Conceptualize visuals based on requirements, Prepare rough drafts and present ideas, Develop illustrations, logos and other designs using software or by hand, Designing social media posters and videos.

PROJECTS

1. Educare Me

A mobile app that works as a platform for financial and material donation to educational projects in poor countries, starting by making accounts for users to be able to participate in the most comfortable way for them.

The donation mechanism is very easy and accessible for its users by clicking on a single button with no complications and multiple steps. whether its cash donation or logistic materials such as books, stationary and bags ..etc. Also users can volunteer in current projects in different fields. In addition to that users can share their thoughts and rate the experience in the application also through social media platforms. As a final result we were keen to send the impact of completion of the project to each donor.

2. Online education app

It is an online educational app that offers anyone, anywhere access to online courses. During the creation of this app we worked to identify and show reviews of each course, By making access very easy where students can search and decide the most helpful course for them. In addition to that every trainer have their own page where students can rate their courses and performances. Also downloading courses were an option to complete the educational process without internet conection.

EDUCATION

2012 Economics University.
