BACK-END DEVELOPER

As an aspiring Backend Developer with an engineering background and recent completion of Re:Coded's Backend Web Development Bootcamp, I bring proficiency in JavaScript and Node.js. Eager to embrace new technologies, I am dedicated to continuous learning and innovation, ready to excel in the dynamic field of backend development.

EDUCATION & CERTIFICATIONS

University of Michigan, 2023
Getting Started with Python

Re:Coded, 2023
Backend Web Development Bootcamp

freeCodeCamp, 2021
Responsive Web Design

Istanbul Technical University, 2021
Bachelor of Science, Geological Engineering

KEY COMPETENCIES

Programming Languages &Technologies
Javascript, Node.js, Python, HTML, CSS, SQL, MongoDB, Git, Swagger, Jest, Postman, ABAP

Languages
Fluent in English and Turkish, Pre-Intermediate in German

PROFESSIONAL EXPERIENCE

Solvia Digital Solutions   Oct 2021 - Aug 2022
ABAP/PDI Developer
- Used Technologies: ABAP, Cloud Application Studio/PDI, Postman
- Developed customizations and enhancements on the SAP C4C (Cloud for Customer) environment
- Utilized both frontend and backend development skills to implement solutions and improve functionality
- Collaborated with cross-functional teams, including business analysts and functional consultants, to gather requirements and translate them into technical designs
- Conducted thorough testing and debugging of developed solutions to ensure high quality and performance

---

PROJECTS

Re:Coded Capstone Project - Cookiz   July 2023 - Aug 2023
Developed a backend application to connect customers with local chefs offering homemade dishes.
- Used Technologies: Node.js, Express.js, MongoDB, Swagger, Jest, OAuth, Postman, and Git
- Developed RESTful API endpoints for user registration, authorization, profile management, and order handling using Node.js and Express.js
- Integrated OAuth authentication for user sign-up and sign-in, allowing users to conveniently access the platform with their Google accounts
- Integrated Swagger for API documentation, enabling easy exploration and interaction with endpoints
- Implemented unit and integration tests for code quality assurance using Jest, ensuring robust and reliable functionality
- Led a four-member team, promoting collaboration, assigning tasks, and reaching project milestones
- Used Git Version Control in a professional environment
