Portfolio

SUMMARY

Frontend developer with a mathematics background, adept at creating intuitive user interfaces and responsive websites. With two years of experience, I excel in JavaScript, CSS, HTML, Next.js, and other web technologies. Beyond technical skills, I thrive in collaborative team environments and actively contribute as a proactive corporate member. I am committed to continuous self-improvement and learning.

EXPERIENCE

Frontend Developer

3Q Digital

06/2022 - Present

- Developed functional applications using NextJS, ensuring functions visually appealing and user friendly.
- Successfully integrated applications with a specialized CRM for customer management.
- Developed websites, implemented server setups, performed debugging, and improved SEO performance across 50+ pages.

Frontend Developer

OpenHanded

06/2023 - 08/2023 Turkey

Led a team of 4 to implement a crowdfunding project using Next.js, Firebase, and Material-UI.

- The project features authentication, Google login, and multi-language support using i18n.
- [Project Link](#)
